NESCAFÉ

THE CHANGE IS IN YOUR HANDS

METAL

Did you know our metal coffee tins* are infinitely recyclable?

That means when you buy and recycle NESCAFÉ, you could help us save up to 400 tonnes of packaging from landfill.**

It's just one of the ways we're improving our coffee from bean to cup. Because every step we take to produce it respectfully, can make a difference globally.

It's in your hands to choose a respectful coffee.

Let's make a change together.

One cup at a time.

*Lids and foils are also recyclable.

**Based on sales figures and resulting packaging from 2021.

The Cheeky Panda is the multi-award-winning producer of sustainable Bamboo paper products; which are kinder for you and the planet.

All our products are FSC, and Vegan Society verified, and we are also proud to be B-Corp certified as well. Since 2017 we have helped to remove over **315,000 kg of plastic** from our supply chain, save over **231,000 trees**, and prevent over **18,500 tonnes of CO2** equivalent entering the atmosphere.

By switching to The Cheeky Panda, your business can help to reduce plastic pollution, deforestation, and lower your carbon footprint with every purchase you make.

recycled cardboard packaging
recycled plastic tape dispenser

Post-it® Recycled Notes* & Scotch® Magic™ Tape Greener Choice**

* 60 % made with plant that grows annually - **67% plant based adhesive

Green products are no longer a 'nice to have.' They are a must!

We only get one planet and taking proper care of it has become a top priority of today's consumers. In a global survey from IBM, more than half (51%) of respondents said that environmental sustainability is more important to them today than it was 12 months ago.

Many are practicing what they preach, with 49% of consumers saying they've willingly paid more for products branded as sustainable or socially responsible in the last 12 months. But these attitudes don't just apply at home, and instead have extended into the workplace as more millennials and Gen Z join the workforce population. In a recent survey of 1,000 UK workers, 49% felt that eliminating the use of unsustainable materials is the most effective way that their organisation could improve their environmental impact, followed by measuring carbon outputs and carbon offsetting important for 39% of these respondents.

With sustainability so important to today's workers and with so many willing to spend a premium for responsibly sourced and made materials, greener products are no longer a 'nice to have.' They are a must. If they aren't already, consumers will soon be seeking out home and office supplies that align with their sustainability values, and it falls on both manufacturers and resellers to answer that demand.

From a manufacturer's standpoint, at ACCO UK we believe that a better tomorrow starts with what we accomplish today. Sustainability is quite literally built into everything we do. 99% of the board and paper used in our products and packaging is recycled, FSC® certified, or PEFC certified, and we strive to use recycled or recyclable materials whenever possible to produce our non-paper products. We offer over 4,300 products with third-party green credentials. Over 1,600 of these products are FSC® certified, a further 750 have Blue Angel certification, and 131 are certified climate neutral.

Our Leitz Recycle range is a shining example of where we're headed with our green product pledges, made of up to 100% recycled material, up to 100% recyclable, and boasts Blue Angel certification, UL certification, and is certified Carbon Neutral.

Highlighting sustainable product attributes on e-commerce sites, in catalogues, and in all marketing materials will make it much easier for customers to find the right solutions that align with their green values. It is likely that resellers will face increased demand for these types of products for many years to come, which will hopefully contribute to both greener profits and a greener planet.

"...49% of consumers saying they've willingly paid more for products branded as sustainable or socially responsible..."

Hassle Free Recycling Solutions

Launched 10 years ago by Kimberly-Clark Professional™.

The RightCycle™ programme has diverted over 1500 tonnes of previously hard-to-recycle non-hazardous PPE from landfill and incineration.

Now offering the opportunity to recycle Kimberly-Clark hand towels and PPE alongside the world's first dispenser installation and recycling service.

Hand Towel Recycling

With no upfront investment or additional labour needed, recycling your paper towels is as easy as throwing them away.

Dispenser Installation and Recycling

Our professional fitters will remove, collect, and collate your old dispensers – no matter who the manufacturer is.

PPE Recycling

Used eligible Kimberly-Clark Professional PPE is collected at your facility, transported to our recycling partner, and turned into new consumer goods.

Increase your building's recycling rate

Support your sustainability goals

Reduce your waste footprint

We consciously conserve natural resources

- 50% of the electricity we generate from our solar panels is used directly to manufacture Durable products
- Over 80% of the plastic waste produced during our manufacturing processes is reused
- Our energy saving LED lighting has saved over 103 tonnes of CO₂
- We've invested in over 4000m² of solar panels at our facilities worldwide

TAKE PRIDE IN PRINTING SUSTAINABLY

Original HP Ink and Toner Cartridges are designed with the planet in mind.
100% of Original HP Toner Cartridges and 82% of Original
HP Ink Cartridges contain recycled content.¹

875M

Since 1991, 875 million HP Ink and Toner Cartridges have been recycled by customers through HP Planet Partners.²

256M

Since the year 2000, 256 million pounds of recycled plastic have been used to make new ink and toner cartridges.²

4.7B

HP has kept over 4.7 billion plastic bottles out of landfills and oceans by upcycling them into new HP Ink Cartridges.²

Learn more at hp.com/go/hprecycle

1. 82% of Original HP Ink Cartridges contain between 45-70% recycled plastic. 100% of Original HP toner cartridges contain between 5-45% post-consumer or post-industrial recycled content. Does not include toner bottles, ink bottles, and other products not listed. See hp.com/go/recycledcontent for list. 2. See hp.com/sustainableimpact.

Businesses across the board are putting a lot of thought and investment into operating more sustainably.

BUSINESS SMART
X SERIES

Help your customers
improve their business
sustainability with our
all-round print solutions.

It's impossible to miss – businesses everywhere are trying to be greener and, besides protecting the environment, there are a host of reasons why, from rising energy costs to tighter regulations.

We asked 500 IT decision makers about their IT strategies. 7 in 10 told us that green credentials are a key decision-making factor when choosing a print supplier.

Demonstrating how you can support a customer's own sustainability goals is also becoming a core ask in many procurement processes.
