- Non-Metallic
- PU Foam footbed

- Resistant to Fuel Oil
- Scuff Cap

The new Edmonton waterproof safety boot is manufactured with GRS (Global Recycled Standards) certified recycled leather as well recycled linings throughout the boot.

With a fully waterproof and breathable membrane, dual density PU/PU outsole and EVA comfort footbed, this boot is designed for hard wearing environments. 100% non-metallic, the boot offers composite toe cap and midsole protection. The outsole is tested and certified to the best slip rating in the 20345:2022 standard, as well as having a scuff cap for extra durability on the toe, and a ladder grip designed to the fire fighters standards. The padded tongue and collar give you added internal comfort.
