In a world full of noise, ZENO restores balance. Each pod creates a space free from distraction, a modern retreat for uninterrupted thought.

Zero distraction. Infinite focus.

ZENO PODS

Designed for Performance. Built for Comfort.

Flexible by Design

Effortlessly adaptable, the cabin seamlessly switches between mobile and fixed configurations, allowing you to move the pod when you need it or stand solid when you don't. In static mode, the total height remains a streamlined 2250 mm, preserving a clean architectural profile.

Intelligent Modular Design

Engineered for efficiency, the cabin features a fully modular frame system that assembles in just 45 minutes, making it one of the fastest in the industry. Formed from six precision engineered components, the refined construction delivers strength, simplicity, and rapid deployment.

Premium Materials & Finishes

A robust structure of 6063-T5 aluminium profiles combined with cold-rolled steel panels ensures durability without excess weight. The exterior is finished in high-grade electrostatic powder coating, providing a smooth, long-lasting surface that meets rigorous adhesion standards.

Advanced Acoustic Comfort

Designed to create calm within busy environments, the cabin delivers up to 31 dB of sound insulation. High-density, eco-friendly acoustic panels work in harmony with internal sound-insulating layers and vibration-isolating EVA seals to eliminate hard-surface resonance. All materials are environmentally certified, flame-retardant, waterproof, and corrosion-resistant.

Crystal-Clear, Certified Glazing

The cabin is fitted with ultra-white tempered soundproof glass, ensuring clarity, safety, and elegance. The glass door features precision silk-screen detailing and 3C safety certification, combining visual refinement with peace of mind.

Balanced Fresh Air Circulation

A dual-direction fresh air system maintains consistent airflow and temperature, ensuring balanced air pressure so the space always feels fresh and naturally breathable.

Thoughtful Integrated Lighting

Soft, ambient illumination adapts automatically to the space, complemented by manual downlight controls for focused tasks. Select models also feature refined LED strip lighting for a warm, modern atmosphere.

Flexible & Connected

Customisable door positioning allows the cabin to fit effortlessly into any layout. Every unit is fully equipped with high-speed data connectivity, UK power outlets, USB and fast-charge USB-C ports, plus a discreet low-level power socket for added convenience.

Guarantee

Supplied with a standard 5-year structural warranty, plus a 1-year warranty on electrical components, including the power supply and lighting.

ZENO PHONE single booth

A beautifully engineered, single-occupancy acoustic pod crafted for moments that demand focus. Whether it's an important call, a brief creative sprint, or a reset between meetings, the Zeno Phone Pod creates instant calm in the heart of any workspace.

Designed for the modern office, Zeno brings together comfort and exceptional acoustic performance. Premium materials paired with precision engineering create a serene environment that moves effortlessly with the evolving needs of your space.

From open-plan floors to collaborative hubs, Zeno Phone introduces a refined privacy zone that elevates productivity and enhances wellbeing.

ZENO HYBRID PLUS

1-4 person booth

A spacious, acoustically balanced workspace that supports focused work, and flexible collaboration.

The Zeno Hybrid Plus builds on the elegance and functionality of the Zeno Hybrid Pod, offering an expanded interior that accommodates up to four people comfortably. Whether used as a compact meeting room, a collaborative project space, or an enhanced personal workstation, Hybrid Plus adapts effortlessly to the evolving needs of modern teams.

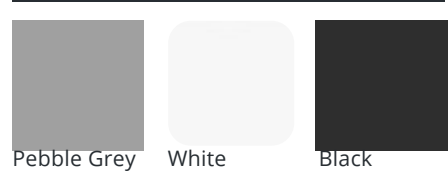

Thoughtfully engineered with premium materials, advanced acoustics, and ergonomic comfort, Zeno Hybrid Plus delivers a calm, versatile sanctuary within the open-plan office. Its generous footprint allows for a full desk setup, casual seating, or a combination tailored to your workflow.

From concentrated solo work to small-group collaboration, Zeno Hybrid Plus creates a refined, self-contained environment where ideas flow and productivity thrives.

ZENO 4 PERSON

4 person booth

A generous, acoustically refined meeting pod designed to bring people together, clarity, comfort and connection all in one beautifully crafted space.

The Zeno 4-Person Pod extends the Zeno family into a larger, shared environment that accommodates up to four people with ease. With ample room for a sofa, table, or tailored meeting furniture, it transforms open-plan offices into versatile hubs for collaboration, private discussions, focused teamwork, or quiet group work.

Designed for modern workplaces that value openness while respecting the need for meaningful privacy, the Zeno 4-Person combines premium materials with advanced acoustic performance to create a calm, well-appointed meeting space. Every detail is carefully considered, from airflow and lighting to ergonomics and aesthetics, resulting in an environment that supports both productivity and wellbeing.

Wherever it's placed, the Zeno 4-Person Pod elevates the workspace with a refined, self-contained room that encourages clear communication and purposeful collaboration. Step inside, gather your team, and let ideas thrive within Zeno.
