

# CLEAN THE AIR WE SHARE

**For complete virus protection\*, add air purification to hand and surface hygiene practices.**

\*The AeraMax Professional Air Purifier from Fellowes was demonstrated to be effective in reducing airborne concentrations of influenza A aerosol in a test chamber, reaching 99.9% airborne virus reduction within the first 35 min of operation.

In Europe,

90%

of the air we breathe is

**POLLUTED**

World Health Organisation (WHO)

A complete hygiene solution should consist of 3 essential components – washing your hands, sanitising surfaces and cleaning the air for protection against person-to-person virus transmission.

**AeraMax® Professional** commercial grade air purifiers provide maximum protection by removing up to 99.97% of all airborne contaminants, including airborne viruses\*.

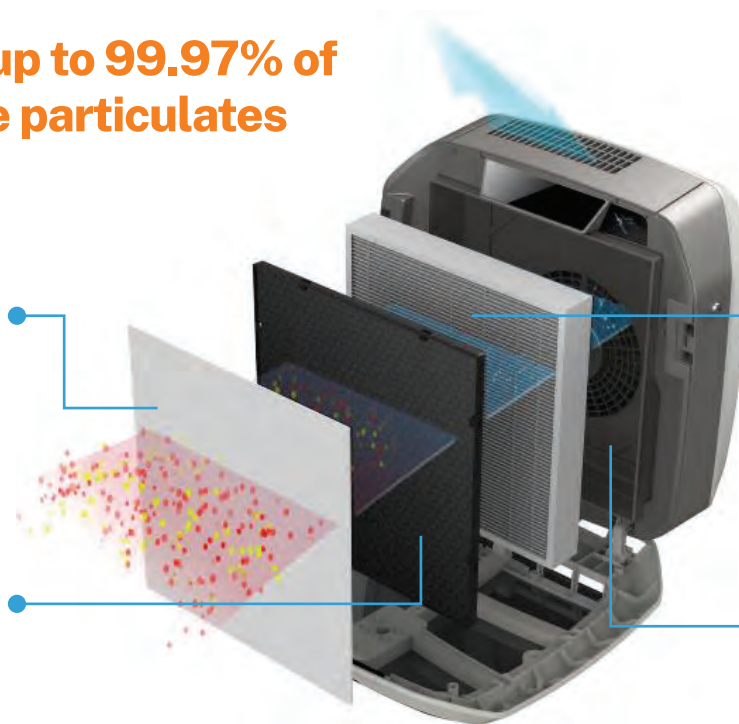

Specifically designed to provide 24/7 smart air cleaning for shared air environments using proven filtration technology.

## Proven Filtration Methods

**Removes up to 99.97% of airborne particulates**

A **pre-filter** captures and removes large particles and contaminants.

**Carbon** filtration adsorbs odours and VOCs.

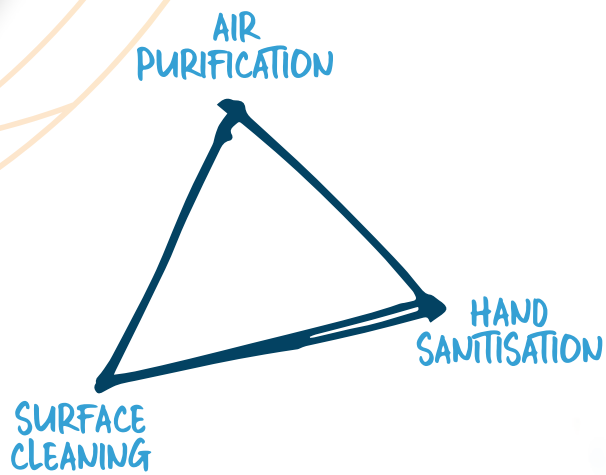

The **True HEPA** filter with antimicrobial treatment captures **99.97%** of airborne particles - as small as 0.3 microns!

**Antimicrobial** treatment on the filter reduces the development of bacteria and fungi.

The **PlasmaTrue™ Bipolar Ionizer** improves capture efficiency of particulate filter.

## Prioritise Clean Air

We surface clean and sanitise our hands, but air is more likely to transmit influenza virus than surfaces are.

Aeramax™ Pro Air Purifiers available in either standalone or wall mounted models
