## Pathogen/COVID Testing Pod

### Features:

- Freestanding individual pod.
- Protective acrylic screen with lower cutout for operative staff protection.
- Acrylic screen cutout allows testing kits to be passed through.
- Worksurface ledges for operative staff use and participant.
- Mirror included for a participant to observe their RNA swab procedure.

## Finishes

### Standard Dual Board MFC Finishes.

Ash

Autumn Cherry

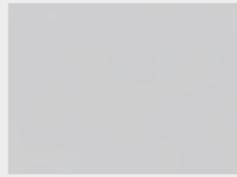

Beech

Chester Oak

English Walnut

Grey

Grey Nebraska Oak

Laurentii Wenge

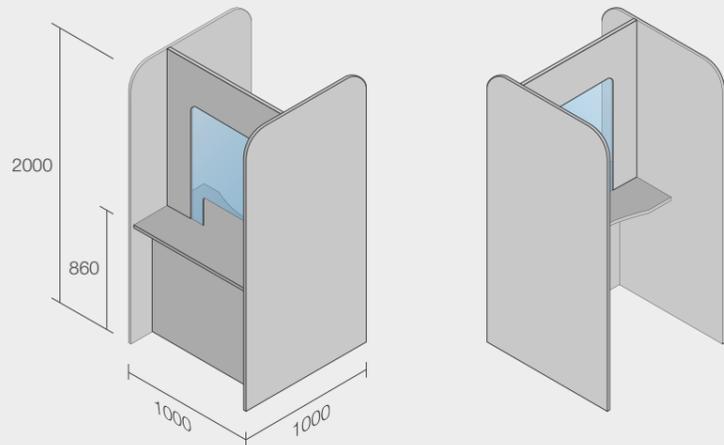

Natural Nebraska Oak

White

## Dimensions, Schematics and Pricing

**Singular Testing Pod**  
Code: SFMC19POD

**Price: £938 Retail**

Our Pathogen/COVID testing pod is designed to achieve a comfortable area while performing RNA tests.

We have designed our pod to be both sturdy, practical and aesthetically pleasing while providing solutions for staff, students, or general public screening.

**Note:** Swab procedure posters and sanitary equipment illustrated in the illustrations not supplied.

## Environmental

We are a proud PEFC member

**Programme For The Endorsement Of Forest Certification (PEFC)**

PEFC is the world's largest forest certification organisation.

PEFC is dedicated to promoting Sustainable Forest Management through independent third-party certification.

PEFC expands forest certification globally through its unique bottom-up approach to certification and is the certification system of choice for family and community-owned forests.

PEFC are an international non-profit, non-governmental organisation devoted to ensuring that forests are managed according to environmental, social and economic criteria.

### Our Plastic Awareness Policy

We adhere to our Circular Economy business model that aims to deliver 100% recyclability.

The use of recycled plastic in place of virgin resin typically results in reduced energy consumption, lower cost, and reduced environmental impact.

Our Pathogen/COVID Testing Pod product permits all plastic components to be recycled through curbside programs. The following illustrates what type of plastic is used and its recyclable properties.

WHAT WE USE	RESIN TYPE	RESIN ID CODE
<b>Pathogen/COVID Testing Pod Construction:</b>		
MFC Panel Edging.	Acrylonitrile Butadiene Styrene.	(ABS) 9
Acrylic Screen	Perspex® Polymethyl Methacrylate.	(PMMA)7
<b>Packaging Materials:</b>		
Packaging Cling Film.	Low Density Polythene.	(LDPE) 4

**Low Density Polythene (LDPE)**

LDPE is not often recycled through curbside programs, but some communities will accept it.

**Acrylonitrile-Butadiene-Styrene (ABS)**

ABS is recycled by first shredding used plastics to produce shredded plastics. After this step, metals and undesirable plastics are separated from the shredded plastics to produce separated plastics.

**Polymethyl Methacrylate (PMMA)**

PMMA, the key type of acrylic, can be recycled in several ways. This normally involves subjecting the resin to pyrolysis. It is possible to recover the monomer from PMMA scrap by depolymerization. PMMA has been successfully depolymerized by contacting with molten lead resulting in MMA with a purity more than 98%.
