

HandshoeMouse Wireless

The special thing about the ergonomic HandshoeMouse is that your complete hand rests on the entire surface of the mouse like a glove.

Thanks to the patented shape, it is not necessary to grab the mouse and lift the finger, when you are operating it. Simply glide over the surface with the mouse. A lightly slant palm and finger supporting computer mouse requires least muscle activity in the hand and results in reduced neural excitation. Reduce the muscle activity in your hand and fingers and start working in the most natural, ergonomic, and comfortable way.
