

Have you implemented the "Room Air-Cleaner Guidance for Schools" yet?

Choose TruSens Air Purifiers equipped with **HEPA FILTERS** to improve the air quality in schools. Protect your students and your staff.

TruSens EXPERIENCE CLEANER AIR

Air purifiers reimagined

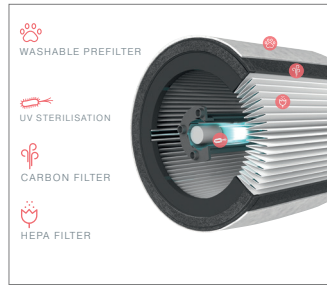

HEPA Air purifiers help you, your students and your colleagues breathe easier by removing microscopic particles, airborne viruses and bacteria, dust, VOC (Volatile Organic Compound)/gases and more in classrooms, halls, staff rooms or anywhere it matters most.

Senses pollutants

The Sensor Pod measures pollutants and communicates results back to the purifier.

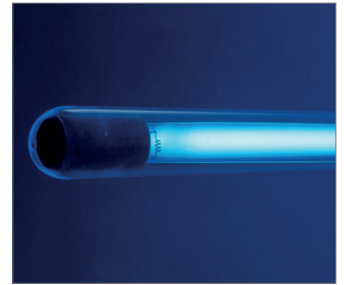

HEPA filter captures pollutants

The HEPA (High Efficiency Particulate Air) filter captures 99% of airborne viruses and allergens down to 0.03 microns.

Clean air everywhere

The PureDirect™ technology splits clean air into 2 streams and delivers purified air efficiently throughout the room.

Pollutants destroyed

The UV-C lamp destroys the pollutants that have been captured by the HEPA filter.

Which model do I need for my school?

The **Leitz TruSens Z-3000** will achieve 2 air changes per hour (ACH) in a classroom up to 70m².

To increase the ACH to 4/hour in a classroom (up to 70m²) with an average number of students (25) we recommend 2 x **Leitz TruSens Z-3000** air purifiers per classroom.

The **Z-2000** is recommended for the staff room or a reception area, with a coverage up to 35m².

The **Z-1000** is recommended for an office, with coverage up to 23m².
