

Due to the catastrophic destruction of Ukrainian cities and infrastructure by the invading Russian forces, there is a desperate need for humanitarian support vehicles in Ukraine, not just for delivering much needed supplies and aid, but also to help in transporting frail, injured and displaced people to places of safety or indeed to hospital as needed.

These vehicles need to be mechanically robust and rugged enough to negotiate terrain that only 4X4 vehicles can successfully manage. 4X4 vehicles, and in particular pick-up trucks, are ideal as they can carry larger loads of supplies and equipment.

We have decided to support our Ukrainian friends by appealing to Irish people to help get as many 4x4 vehicles as we can out to Ukraine where they are needed. For this purpose, we have set up an iDonate page to facilitate donations that will be used for the purchase, servicing, and delivery of the vehicles to Ukraine, for which we will also need to use the services of volunteer drivers to bring them to the Polish Ukraine border.

IRISH 4X4S FOR

UKRAINE

Our intended departure/delivery date is August 1st 2022. The more funds we can collect, the more 4x4s we can deliver. We also invite others to join our efforts to source and donate a 4x4 vehicle and join our convoy. Each vehicle will be delivered loaded with much needed relief supplies.

The Irish people have always shown outstanding levels of support and empathy for people in need of assistance and we ask for your donation, no matter how large or small, to help us to help those people still in Ukraine who desperately need our help.

WE NEED YOUR HELP!
