BE SAFE

Working from home has become the 'new' normal. Online meetings, children popping up during a call, cats on keyboards, we have all been there over past months. And it will stay. The balance between working in an office and working from home has changed forever. This is also reflected in corporate gifting, which has become more personal. Onboarding kits are sent to a home address and a goodie bag for a conference is now more likely to include true wireless earbuds. Working from home products can support a company's strategy as well as any other gift. Whether you choose more sustainable products or you opt for a corporate look, make sure your staff can work from home as well as from the office.

WHAT IS RFID?

Radio-Frequency Identification (RFID) is the use of radio waves to read and capture information stored on a tag attached to an object. The RFID tag provides a unique identifier for the object and like a bar code or magnetic strip, must be scanned to get the information.

WHAT IS RFID BLOCKING TECHNOLOGY?

RFID-blocking wallets and pockets are designed to help protect you from this new brand of electronic pickpocketing. These items are typically made from a material that interferes with radio waves, making a cards RFID chip difficult to read.
