

EVANS GOOD PRACTICE

Top 10 Safety Tips

- 1** Always read the label and follow the instructions for use. Always add product to water. 
- 2** Always use the appropriate personal protective equipment (PPE). 
- 3** Never mix Evans formulated products as this can cause a chemical reaction. 
- 4** Never put Evans cleaning products into unmarked containers. Ready to use labels are available. 
- 5** Never add Evans products to containers that are labelled for other uses, i.e. water or drink bottles. 
- 6** Know where to find your Safety Data Sheet. Know your first aider is and how to contact them. 
- 7** Ensure all Evans products are stored correctly. Keep chemicals away from children. 
- 8** Always report any faulty equipment, spills or damaged containers to your supervisor. 
- 9** Know and follow your standard operating procedures. Follow safe working practices. 
- 10** If you notice anything in your workplace that you think is unusual or dangerous report it to your supervisor immediately.
