NAVIGATOR™
Office Paper Solutions

Making a good impact

Environmental conservation is of prime importance for The Navigator Company, working every day to develop sustainable solutions.

Our products originate from forests with certified responsible management and are manufactured using a high percentage of renewable energy.

Your choice of The Navigator Company's products is also a positive step towards a more sustainable world.

Eucalyptus globulus

Navigator is a truly ecological product, biodegradable and recyclable made from a natural renewable resource: *Eucalyptus globulus*.

Each *Eucalyptus globulus* tree has a **12 years lifespan** before being transformed into paper.

Eucalyptus globulus **provides 68% more pulp than pine**, using the same amount of wood. This means we are able to produce the same quantity of paper whilst using **40% less wood than pine.**

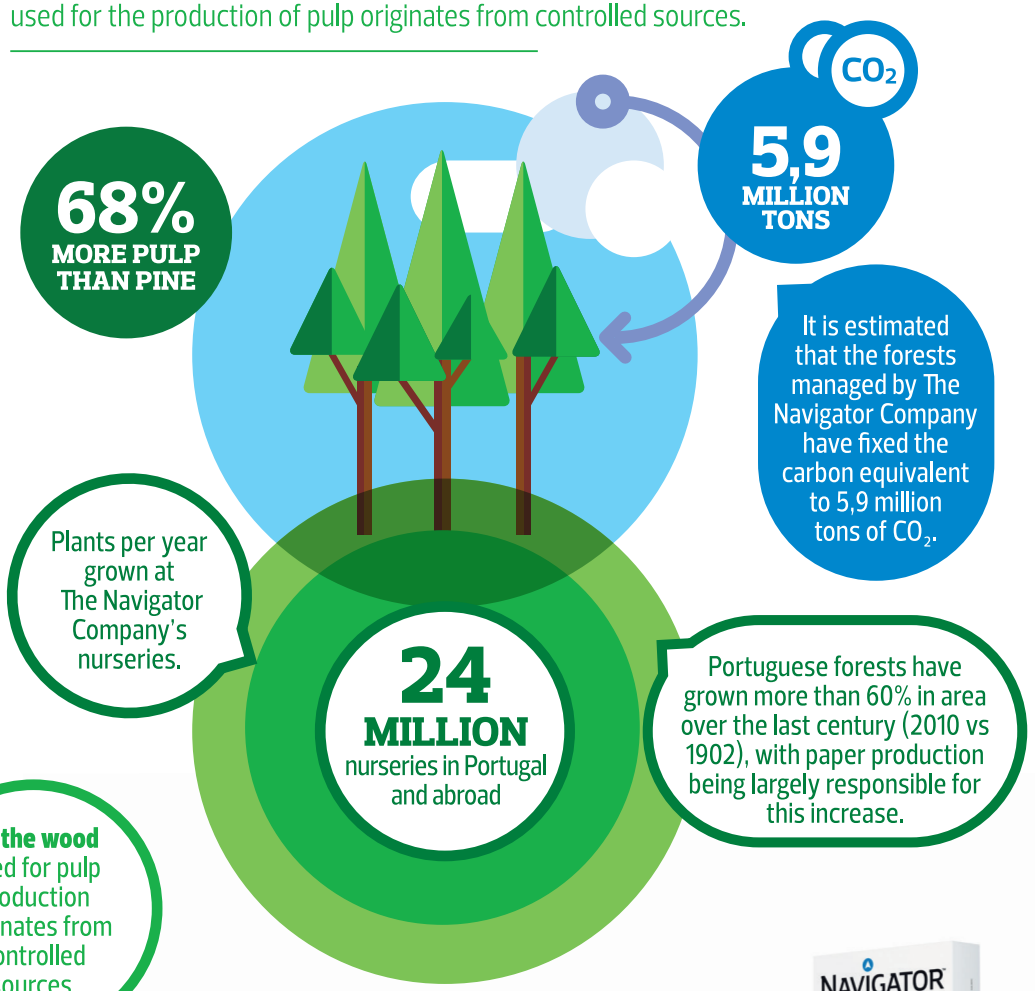

All the wood used for pulp production originates from controlled sources.

PRODUCED IN PORTUGAL BY **THE NAVIGATOR COMPANY**

The forest

Together with modern and certified production facilities, our FSC® and PEFC forest management certifications ensure our commitment towards environmental protection and guarantee that all the wood used for the production of pulp originates from controlled sources.

All Navigator range, with exception of 160g.m^{-2}, has been awarded EU Ecolabel

Green Energy and Production

The Navigator Company reduces its environmental impact through the use of more efficient production methods and is a global leader in the renewable energy sector, being the first Portuguese producer of green energy from biomass.

Cascading System

The recycling cascade is refreshed by virgin fibres with specific qualities and traits that provide the best quality sustainable products and guarantee a more effective recycling process.

CO_2 Neutral COMMIT TO THE PLANET

The company aims to reduce its emissions and offset the residual ones by 2035, reaching a Carbon Neutral Industrial Process that year – much sooner than planned by the EU.
