SALT LEVEL
MONITORING

NEW

SALT LASER

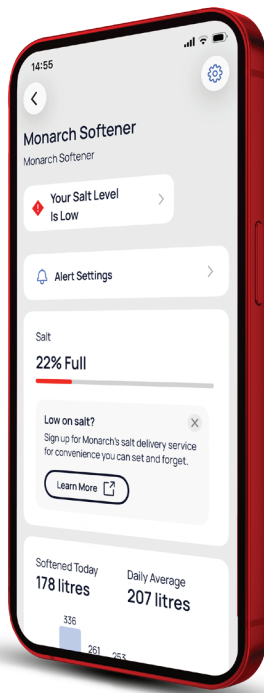

The Salt Laser is an intelligent salt-level monitoring system designed to take the guesswork out of maintaining your water softener.

Using precision laser technology, it continuously measures the salt level inside the cabinet and tracks when levels are running low. Connected to the mobile app via WiFi, it gives homeowners real-time visibility and instant notifications — helping ensure the system always performs at its best.

NEW
MOBILE APP

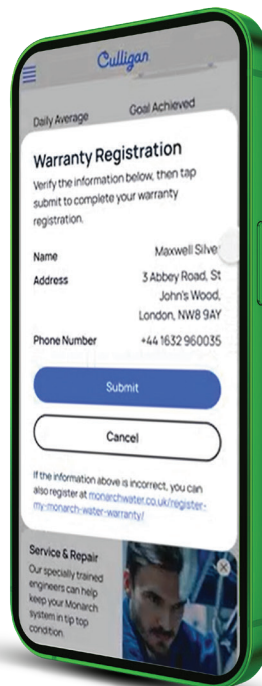

Our new mobile app gives the homeowner greater control and visibility over your Monarch Water Softener, all from the convenience of their smartphone. You can easily monitor their water usage, check the status of your softener, and keep track of your salt levels so they always know when it's time to top up.

Track your Salt Levels

One of the standout features of the Pro Range is its intelligent salt monitoring system. The app keeps track of salt levels and sends notifications when it's time to refill, removing the need for regular manual checks.

Protect
your future

You can submit your warranty on the app, making this crucial step simpler, and quicker!

Track your water usage

Advanced insights now give you even more information about your home and your usage. The Monarch Pro app allows homeowners to monitor household water consumption directly from their smartphone. This provides valuable insight into daily usage patterns and can help identify unusual spikes that may indicate waste or leaks.

*7-year parts warranty is subject to an annual service by Monarch Water.

opti
brining®

A proprietary, intelligent technology used in Monarch Water high-efficiency (HE) softeners that reduces salt, water, and energy consumption by up to 46%.

It works by monitoring water usage patterns and regenerating only when necessary, offering higher capacity and efficiency than conventional softeners

REMOTE DIAGNOSTICS

Our remote diagnostics service allows us to monitor the status of the Monarch Water Softener directly from our headquarters.

By having access to key system information, we can diagnose problems faster and arrange service appointments more efficiently. In many cases, this helps us prepare the right parts and expertise in advance, reducing downtime and getting our system back to optimal performance sooner.

Excellent aftercare service

Investing in a Monarch Pro Range water softener means gaining access to one of the UK's largest and most experienced water softener service networks.

Our nationwide team of trained engineers and call team support customers with installation, servicing, repairs and ongoing maintenance, helping to maximise system performance and longevity.

Whether you need technical advice, scheduled maintenance or rapid support, our dedicated service team is on hand to provide expert assistance. With comprehensive UK coverage and a reputation for outstanding customer care, we help ensure your water softener continues to deliver reliable protection against hard water and limescale for years to come.

Real people, real experiences

Mrs P

Great service!

Called to book a visit to a unit in a house I had just bought. The engineer arrived on the day booked at the time arranged. Very helpful and checked everything, did the service and showed me what to do going forward. Very happy.

Sue J

A very professional job

The engineer turned up promptly. He answered any questions I had and explained the service process. He was very professional and I was happy with the work completed.

Peter K

Brilliant Engineers!

Richard Lawrence was brilliant! Spent the time to explain how the softener works. Service was done promptly, and the water was checked to confirm that the softener is performing correctly. Great work - Thank you!

"I've had a Monarch softener for a few years now – it's a great unit and has made a huge difference in our home."

Danny Walters | Keanu Taylor, Eastenders
