

POWER FLUSH FX2

Power flushing and descaling chemical

- Formulated specifically for use with power flushing pumps.
- Thoroughly cleanse systems in one visit, no need to pre-treat.
- Rapidly dissolves and mobilises rust, sludge and corrosion debris.
- Suitable for use with steel, stainless steel, cast iron, copper, brass and bronze (not aluminium)
- Starts to work immediately on addition to system.
- May be used cold.

Available in the following sizes: 2.5 litres | 5 litres | 25 litres

HYPER FLUSH

pH neutral heating system cleanser

Use for: power flush, gravity flush, or pre-treatment for heavily fouled systems. Suitable for systems of all ages and those containing aluminium.

- Extra solvency power dissolves and mobilises rust and sludge.
- Suitable for use with steel, stainless steel, copper, brass and aluminium.
- Cleans during normal operation of heating system.

Available in the following sizes: 12x 500ml concentrate | 10 litres | 25 litres

SYSTEMSAFE DM

Corrosion and scale inhibitor
PERFORMANCE TESTED

Suitable for multi-metal systems, with iron, steel, copper, brass and aluminium.

- Prevents scale, sludge and magnetite formation.
- Prevents micro-biological contamination.
- Prevents internal pitting and galvanic corrosion.
- Protects and extends life of heating system.

Available in the following sizes: 12x 500ml concentrate | 10 litres | 25 litres

NEUTRALISING CRYSTALS

For neutralising acidic flushing chemicals before disposal

- Mild neutralising agent used to increase pH after use of Power Flush FX2.
- Free flowing powder enabling addition direct into pump tank.
- Ensures neutralisation of any residues.

Available in the following sizes: One-Shot tubes | 2.5 kg | 15 kg

FOR MAXIMUM EFFECT USE KAMCO POWER FLUSHING CHEMICALS WITH KAMCO CLEARFLOW POWER FLUSHING PUMPS

SYSTEM HUSH

On-line descaler to silence boiler noises

- Cures 'kettling' and boiler noises.
- Removes baked on corrosion and light scale from heat exchangers
- Works during normal operation of the system.
- No need to drain down - may be left in system.

Available in the following sizes:

12x 500ml concentrate | 10 litre | 25 litres

SYSTEM PRE-CLEAN

Pre-commission cleanser

- For new and modified heating systems.
- Neutralises and eliminates corrosive flux residues, installation debris, oil and grease.
- Conditions and prepares metal surfaces before application of corrosion inhibitor.
- Effective in one hour of heat operation.

Available in the following sizes:

12x 500ml concentrate | 10 litres | 25 litres

SYSTEM SEAL

Leak sealer for heating and cooling systems

- Cures inaccessible leaks in vented and unvented systems.
- Suitable for under-floor heating.
- For use with all materials used in heating and cooling systems, including aluminium.
- Effective in less than 24 hours.

Available in the following sizes:

12x 500ml concentrate

SYSTEMSAFE BIO

High performance biocide and fungicide

- For underfloor, conventional heating and chilled water systems.
- Removes and prevents micro-biological contamination.
- Suitable for use with all metals and plastic polymers.
- Low 0.25% dosage rate.

Available in the following sizes:

12x 500ml concentrate | 10 litres

FREEZBREAKER LT

Antifreeze for heating and cooling systems

- Effective down to -32oC.
- For use with all materials used in heating and cooling systems, including aluminium.
- Low-toxicity - meets BS6580.

4x 5 litres | 25 litres
