## INSTALLATION INSTRUCTIONS

1 Remove the plastic washer and nut from the thread and position the valve in the cistern.

2 Secure valve to the cistern by replacing the plastic washer and screwing the nut to the thread. Do not over tighten.

3 Fit suitable ball float to end of float arm. The position of the ball can be adjusted by loosening plastic wing nut, when desired position is achieved re-tighten wing nut.

4 The arm length can also be adjusted by sliding the adjustment clip to unlock, move the arm in or out to desired length then lock the clip.

5 The water level can be adjusted by turning the adjustment screw (clockwise for less water, anticlockwise for more water).

## TROUBLESHOOTING

1 Ensure water is switched off and loosen the retaining nut.

2 Remove the valve from the retaining nut.

3 To access the diaphragm washer remove white plastic insert.

4 Remove the diaphragm washer and clean or replace.

5 Re-connect valve.
