# NV Features

## Chair Back Mesh

**Material:** TPEEtM + PET

**Description:**  
Besides being highly permeable the chair back mesh is flexible, strong and supportive which gives the user better support while seated.

## Chair Frame

**Material:** Nylon + GRP

**Description:**  
In addition to the streamlined curve it also provides comfort and acts as a support for the central part of the mesh.

## Armrest

**Material:** Nylon + PP

**Description:**  
The plastic armrest can be adjusted by 100mm in height and stop in 10 positions by button control.

## Seat Height Adjustment

**Description:**  
This lever allows the user to control the seat height between 475 - 585 mm.

## Castors

**Material:** PU

**Description:**  
60mm PU castor. Durable, scratch resistant, supports heavy loads and is suitable for many different surfaces.

## Arm Pad

**Material:** PU  
**Description:**  
Durable, scratch resistant, supports heavy loads and suitable for various material finishes.

## Seat Shell

**Material:** PP + GRP  
**Description:**  
The advantages of PP are its recycling features and light weight strength. GRP adds firmness and durability.

## Back Tilt

**Description:**  
By using this lever the user can control the seat tilt with 4 locking positions.

## Seat Slide

**Description:**  
The NV chair includes a seat slide which allows the user to adjust the depth of the seat.

## Star Base

**Material:** Nylon + GRP  
**Description:**  
Solid design to guarantee durability and safety. It matches the EU RoHS / REACH / PAHS standard which is impact, low temperature, UV and oxidizing resistant.
